S-LINK-1.1

HD Wireless Audio Receiver & Headphone Amplifier

Thank you for purchasing the DD Audio S-LINK-1.1 HD wireless audio receiver and headphone amplifier. Please read this manual carefully for instructions on device operation.
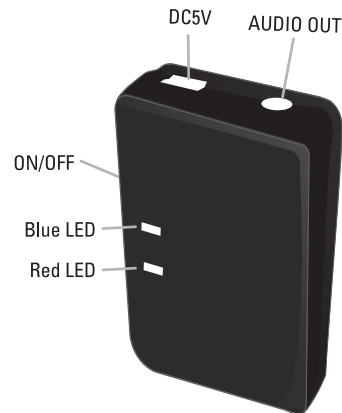

Setup and Operation:

1. Before initial use, fully charge your S-LINK-1.1 by connecting the supplied USB charging cable to the S-LINK-1.1 and to a computer or USB charger. Turn the S-LINK-1.1 off during charging. While charging, the red LED will illuminate steadily.

2. When the S-LINK-1.1 is fully charged the red LED will turn off, and you can remove it from the USB charging cable.

3. Connect the S-LINK-1.1's 3.5mm audio output to an amplified speaker system via the supplied stereo audio transfer cable for use as an audio receiver, or connect a set of wired headphones directly to the S-LINK-1.1s 3.5mm audio output for use as a wireless headphone amplifier.

4. Turn the S-LINK-1.1 on, and verify it is in pairing mode. When in pairing mode, the red and blue LEDs will flash.

5. Turn your device's BT feature on and initiate a search for new devices.

6. Once your device locates the S-LINK-1.1 it will show S-LINK as an available or other device. Select S-LINK on your device and it will automatically pair. No PIN is required.

7. Once the devices are connected, the red and blue LEDs will be continuously illuminated.

Now you're ready to start streaming HD audio wirelessly from your device!

8. Turn the unit off when not in use to maximize working time.

DC5V   AUDIO OUT
